PROFESSIONAL SUMMARY

Computer Science and Data Science engineering student with a 9.22 CGPA and experience in Python, Pandas, NumPy, SQL, data analysis, and visualization. Completed a Data Science internship involving data preprocessing, exploratory data analysis, and reporting, and built a Power BI HR Analytics Dashboard using Excel. Interested in data analytics, data quality, market research, and business intelligence.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analytics: Pandas, NumPy, Statistics, Data Cleaning, Exploratory Data Analysis (EDA)

Visualization and BI: Power BI, Excel, Matplotlib, Dashboard Development, Reporting

Frameworks and Tools: Django (basic), Jupyter Notebook, MySQL, SQLite, Git, GitHub, Postman, Docker, Render

AI Tools: Google Gemini API, Generative AI tools

SOFT SKILLS

Analytical Thinking, Problem-Solving, Teamwork, Leadership, Adaptability, Quick Learning, Attention to Detail, Communication

INTERNSHIP EXPERIENCE

Data Science Intern | SkillCraft Technology | August 2026

- Performed exploratory data analysis on the Bank Marketing dataset to identify patterns and trends.
- Used Python, Pandas, and NumPy for data preprocessing, transformation, and analysis.
- Created Matplotlib visualizations and analytical summaries covering campaign activity and subscription outcomes.

PROJECTS

HR Analytics Dashboard | Power BI, Excel

- Built an interactive dashboard to analyze employee demographics, education, job satisfaction, training, and promotion trends.
- Provides HR teams with workforce insights to support data-informed employee and management decisions.

SmartStore.ai - E-commerce Builder | Cyber 4.0 Hackathon (Team Technova) | Source Code

- Contributed as Backend Developer, working with Django, Django REST Framework, and API integration for a guided online-store creation workflow.
- Designed to help small businesses create and customize digital storefronts with business details, logos, banners, and descriptions; deployment was not completed within the hackathon timeline.

IoT Smart Attendance System | Individual Project

- Developed an ESP32-based attendance system with automated attendance recording, LCD display, and CSV-based storage.
- Designed for schools, colleges, and organizations to reduce manual attendance work; received 1st place at an IEEE exhibition.

Traffic Accident Analysis | Python | Source Code

- Analyzed traffic accident data using Python to explore patterns and trends in accident-related datasets.
- Can support road-safety analysis by helping identify accident patterns and inform data-driven reporting.

EDUCATION

Atria Institute of Technology, Bengaluru, Karnataka

B.E. in Computer Science and Data Science (CSDS) | CGPA: 9.22/10 | 4th Semester SGPA: 9.41/10

ACHIEVEMENTS AND CERTIFICATIONS

- Data Science Internship Certificate - SkillCraft Technology (August 2026)
- 1st Place - IEEE Exhibition for IoT Smart Attendance System
